

# Seal of Acceptance™

## Clinical Safety Testing guidelines

National  
Eczema  
Association

- All testing data must have the Fitzpatrick Skin Type or similar submitted with the testing data that shows different skin types, varying gender and age stratification from 18 years old and up.
- It is acceptable for the testing site to be outside of the United States as long as the requirements are met.
- Product testing on animals is not accepted.
- A list of Clinical Safety Testing companies can be provided [upon request](#).

Clinical Safety Testing results should be submitted to NEA [here](#). Please [contact us](#) if you'd like us to send you a list of clinical safety testing companies who are able to meet our testing requirements.
